SYNAOS shapes and significantly advances the automation and digitalization of intralogistics. Our industry-leading, scalable, data-driven Intralogistics Management Platform (IMP) orchestrates material flows with mobile robots, forklifts, and people in factories and logistics centers.

In addition to Volkswagen, Schaeffler, and MAN, companies such as Harry Brot and the ZF Group rely on our software and consulting expertise across four solution scenarios: Mobile Robot Fleet Management, Forklift Guidance, Real-Time Localization, and Warehouse Execution.

Trusted by industry leaders.

# Our Solutions – Connect and Integrate

SYNAOS delivers a versatile, one-for-all platform designed for manual and automated material flows, optimizing today’s operations and futureproofing them.

## Mobile Robot Fleet Management

Orchestrate mobile robot fleets, increase resource utilization, reduce delays and downtime

## Real-Time Localization

Switch forklifts from offline to online with our unique and easy-to-implement sensor kit

## Forklift Guidance

Improve the operational efficiency of manually operated forklifts by integrating them into AI planning processes

## Warehouse Execution

Operate storage and material flow in your warehouse door-2-door and implement dedicated picker apps fast
