Customer network with over 200,000 companies

Total Logistik

Place freight correctly in freight exchanges

The problem for companies:

1) Which freight exchange is the right one?
2) How do I integrate the freight exchanges into my daily work? Manuel ? Via API?
3) What costs will it incur to digitalize the Work/Company?
4) What does digitalisation via API cost??

We have dealt intensively with this topic and want to offer logistics companies a solution that keeps the costs manageable and still achieves success, i.e. the cost-benefit factor is more than positive!

Advantage for the TMS:

1) Access for customers to more than 15 freight exchanges
2) Maintenance of only one API → Cost reduction
3) Customer loyalty
4) New customer acquisition

Advantage for the Freight Exchange

1) Possible to get more clients
2) Get more loads or loading space on the Platform
3) Keep clients with the own Account

Total Logistik

The problem of API integration

API interfaces can quickly cost over 10,000 euros and that for the connection of just one freight exchange - this limits the options for logistics companies. Example:

Total Logistik API-Solution for clients

One API, unlimited possibilities
- Only one API implementation for access to multiple freight exchanges
- Choose from our growing network of connected freight exchanges
- Post to your own account or use the Total Logistik account

AI-supported scheduling for your fleet
- The Total Logistik AI dispatcher proactively searches for return loads in Freight Exchanges
- Minimization of empty runs through predictive planning
- Improved CO_2 footprint through optimized capacity utilization per kilometer

Entrymodule for freights or Loadingspace
Enter and publish freight or loading space directly via the Total Logistik website

Digitale Spedition of Total Logistik with a big Network

Total Logistik API-Solution

Example of published freights

Functionality

TMS customer, Customer with own TMS or even customer without a

solution can use to the Total Logistik system.

Freight distribution:

- Via own customer account or Total Logistik account
- To freight exchanges and carrier TMS systems

Service fee: Monthly fee depending on the scope of service (individual offer on request; each branch is considered separately).

Account service: For customers without their own account, we offer the pseudonymous use of our Total Logistics account and transmit the carrier data back.

Loadingspace distribution
- to own Account in Freight exchanges

Total Logistik

Advantages of the Total Logistics Platform

Country-specific freight exchanges: Publication in specific markets for maximum reach.

Efficient brokerage: After successful brokerage, transfer of carrier data for transport allocation and document dispatch.

Certified network: Cooperation with certified companies - TMS customers and freight platform users.

Europe-wide network: Access to a comprehensive Europe-wide TMS network and publication in country-specific freight exchanges.
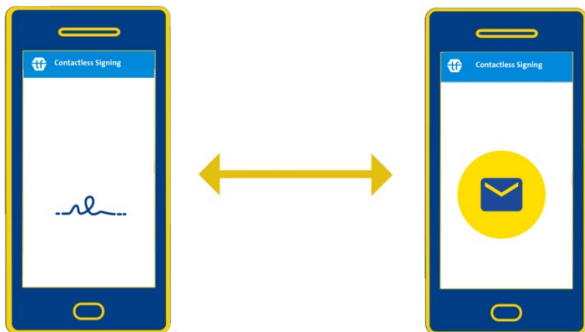

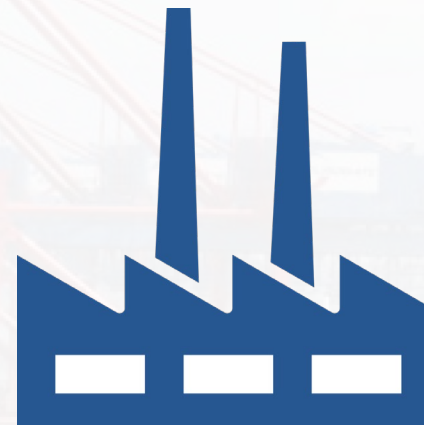

Advantage for TMS providers: Access to many freight exchanges with one API; standard API possible.

Total Logistik

Why work with Total Logistik?

1. **Comprehensive market coverage:** We offer your customers access to all freight exchanges in Europe

2. **Standardized API solution:** One API for accessing all exchanges - significant added value for your customers with less effort and maximum cost efficiency for you as a TMS provider

3. **Flexibility:** Use our dynamic standardized API or start with standard CSV-format for the upload

1. **Faster switching:** Your customers profit from Total Logistik's digital and AI-supported freight forwarding for accelerated freight brokerage
