

Pocket sorter

Transport, store, sorte & sequence
orders with a single system

 **TRANSITIC**
connected intralogistics

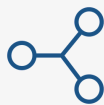

A simple system for maximum efficiency

Perfect for small parcels and accessories in the **e-commerce, retail, fashion & omni-channel** sectors
Transport, store, sort and sequence orders using as little space as possible

Rollerless adapter : no bearings, no rollers for **reliable, silent transport** that's easy to maintain

Identification via **RFID chip or barcode**: items can be tracked and identified effortlessly

Connected and 100% configurable

Natively integrated into our WCS. Collects performance data in real time and adapts to activity via an user-friendly interface.

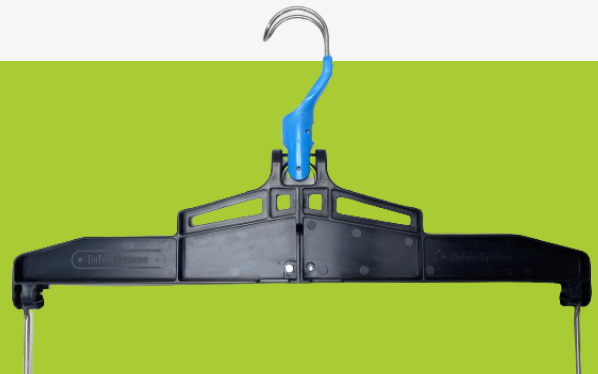

Modular and scalable

Easily integrated into existing overhead systems. Frees up floor space and can be easily extended to meet changing needs.

Patented system

Hard metal hook
Full flex hanger
Barcode or RFID-tag possible

The advantages

- Proven conveying and sorting technology
- Elimination of gravitational distances
- Minimization of line pressure issues
- Reduced operator handling
- Fewer picking errors
- Optimised order returns
- Low maintenance
- Adaptation of flows and sequencing

A simple system for maximum efficiency

Accepted load types

Loads parcels, accessories

Max. weight 3,5 kg

Max. length 500 mm

Max. width 400 mm

Max. height 150 mm

General features

Material antistatic metal

Performance up to 7 500 pockets / h

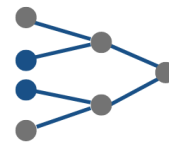

picking

loading

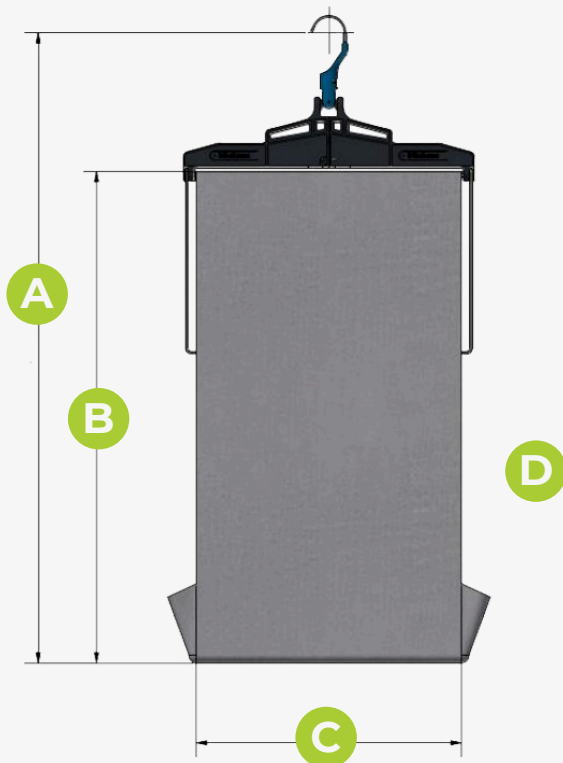

buffering

sequencing

unloading

A. 1000 mm

B. 820 mm

C. 445 mm

D. Side or top loading possible
