3D
Sorting System

The structures of 3D Sorting System ▼

The advantage of 3D Sorting System ▼

More Flexible

- Ideal solution increase the sort destinations and volume
- single robot breakdown will not affect the whole system due to the modular design

Significant advantages of 3D sortation system

- 3D sortation system increases more than 5 times of efficiency compared with the traditional methods
- Reduce walking mileage and labor load

Rapid deployment

- In one or two weeks
- ROI \leq 2 years

More Efficiency and Accuracy

- Sorting performance: 1300 PPH (Parcels/Per/Hour)
- 99.99% sorting accuracy

Maximum number of chutes

- 10000 chutes available

More Space Utility

- 1200 chutes cover 230m² area
- Reduce space cost and improve footprint utilization.
